

Wire conduit for wire spools

OVERVIEW

High-quality wire conduit delivers the filler wire smoothly from the spool to the feeder. Male connectors on both ends fit into the Kemppe feeder and Kemppe wire spool support.

Note! Product codes don't include a female snap connector for a wire spool holder or wire drum and must be ordered separately.

Note! In the applications of stainless steel or aluminum, a separate chili liner is required.

WIRE CONDUITS (STANDARD LENGTH)

Product code	Description
SP600535	Wire conduit-1.8m robot
SP600536	Wire conduit-3.0m robot
